ward in bold relief as an economizer of time and labor. The test is evident that the wants of the community at targe con-not be not through the medium of absorate and expensive mechanic. To meet this want, the Rogers' Machine has been

Place it within the Reach of aff. He construction is no simple, and yet it is so reliable for the zecution, that a child care manage it with success. It is almost noiseless in its operations, and for all kinds of fancy or sain seving for Families, Tailone, Dress-makers, &c., it is not accelled by any partitions in the market.

Among the adustriages this Mashine has over others, are its following: its following:

1st. It is no simple in the construction, that a few morphits
naturation will combin any person to become marker of ft.

2d. The sum is no classife as the most circuit shape and therefore is free from all liability to break from washing or froming.

2d. It will sew alloe on all material, from the finest fining is 2d. It will now allke on all material, from the finest lines the coarsest wholes.

4th. Every kind of sewing allk and thread can be used, and the thread does not need to be ciled.

The question any arbon, how we can furnish a machine at so low a figure, which is in termy respect equal, and in some superior, to high-priced machines? We assert:

1st. The profits on expansive machines are continous; those on ours are networkers are as simple in their arrangement, that they can be preduced at a mitch less cost, thereby also relating the hability of their getting out of order.

With these aftendance, both regarding price, simplicity of construction, and neathers and quality of work, we featherly place it in conspicition with any machine in the market, faily relying upon its merits to anothin itself before the public.

2. Agents Wanded, in whom exclusive County rights will be given. Orders by mail or Express respectibilly sellected, and promptly attenued to.
